

PARTNER PROFILE

Erasmus University Rotterdam

We are excited to showcase the incredible team at [Erasmus University Rotterdam](#), contributing their expertise to the Horizon Europe Link4Skills project. EUR team is deeply involved in groundbreaking research on migration and skill development, collaborating closely with IMIS and [Toronto Metropolitan University](#).

Meet the Team

Prof. Dr. [Godfried Engbersen](#) - Team Leader
Prof. Dr. Engbersen leads our team with extensive knowledge and a strategic vision for migration research. His leadership drives our innovative approaches and impactful studies.

Dr. [Erik Snel](#) - Researcher

Dr. Snel brings a wealth of research experience, focusing on reanalysing IMAGINE data on migration corridors. His analytical skills are crucial to our understanding of migration patterns and trends.

Dr. [Julia Reinold](#) - Post-doc

Dr. Reynolds coordinates surveys in destinations with highly skilled migrants, ensuring our research is comprehensive and data-driven. Her dedication and attention to detail enhance the quality of our findings.

Kim Wever - Project Manager

Kim Wever manages our EC-funded research projects with exceptional organizational skills and expertise. Her role is crucial in ensuring our projects run smoothly and efficiently.

Key Contributions

Reanalysing IMAGINE Data on Migration Corridors

Our team is responsible for reanalysing the extensive IMAGINE data, providing fresh insights into migration corridors and their implications for skill development.

Coordinating Surveys in Destinations with Highly Skilled Migrants

We are also leading the coordination of surveys in key destinations, focusing on the experiences and integration of highly skilled migrants. This work is vital to shaping effective migration policies and practices.

Helping to Conceptualize and Operationalize Migration Skill Corridors

Our research team plays a pivotal role in helping to conceptualize and operationalize migration skill corridors, ensuring these pathways are effective and beneficial for both migrants and destination regions.

Collaborative Efforts

Erasmus University collaborates closely with IMIS at [Universität Osnabrück](#) and TorontoMet, enhancing our research capabilities and broadening the scope of our studies. This collaboration ensures that our work is informed by diverse perspectives and cutting-edge methodologies.

We are proud of the contributions our team is making to the Link4Skills project and look forward to continuing our impactful work in migration and skill development.
