

PARTNER PROFILE

Science-Policy Interface Agency (SPIA)

SPIA plays a pivotal role in our mission to foster fair skill utilization and exchanges across Europe, Africa, Asia, and America.

Leading the charge at SPIA is [Terry Martin](#), a journalist and agency director who is spearheading Work Package 6 (WP6). Under Terry's expert guidance, WP6 is focused on impact, dissemination, and communication, as well as building synergies with sister projects and other relevant EU-funded projects.

Terry Martin brings a wealth of experience and a strategic communication vision to our consortium. His leadership in WP6 ensures that we build robust connections with stakeholders, enabling the effective dissemination and exploitation of project results.

SPIA collaborates closely with Akademia Leona Koźmińskiego - Kozminski University, Toronto Metropolitan University (TorontoMet), and all our partners to facilitate communication about Link4Skills, ensuring we address global skill shortages and promote fair skill flows.
