Horizon Europe

Introducing

The Link4Skills
Navigator

AI-assisted prototype for smarter skills and migration policy

A digital decision-support tool designed to help policymakers, labour market authorities, and researchers address skill shortages and shape fair, effective migration pathways.

WHAT THE NAVIGATOR DOES

Core Features

Interactive Dashboards
Curated labour market and migration data in an accessible visual format.

Scenario Comparison Tool
Explore policy trade-offs across re/upskilling, automation, and migration options.

Migration Skill Corridor Mapping
Visualise and assess existing and potential skill partnerships.

MIRA – Migration-Informed Recommendation Assistant
AI-assisted, expert-validated guidance to support policy reflection and scenario analysis.

CO-CREATION INVITATION

Help shape the Navigator

The Navigator is being co-created through structured stakeholder workshops and consultations. Your engagement helps ensure the tool is:

• Fit for real-world decision-making
• Policy-aligned and institutionally usable
• Sustainable beyond the project lifecycle

Interested?
Participate in a consultation session and test the prototype.
